Allowable Subject Matter

- 1. This application is in condition for allowance except for the presence of claims 8-15 non-elected without traverse. Accordingly, claims 8-15 have been cancelled.
- 2. Claims 1-7 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: Applicant filed a response with a 1.132 declaration on 11/14/2003. Applicant argued that while the cyan coupler of the JP '785 reference may include the coupler represented by the instant formula I, the couplers of the instant invention have a specific combination of groups and this combination provides unexpectedly superior results. The examiner has considered the declaration evidence, and it does appear that the coupler of the instant invention provides superior and unexpected results with respect to the density of the magenta component in cyan, in the processing color-mixing, and in the light fastness when compared to couplers identical expect for the position of the methyl group and compared to couplers 32 and 33 of the JP '785 reference (the two that were cited by the examiner as being the closest prior art examples). Therefore, the rejections made in the previous office action have been dropped. The examiner performed an updated search of the prior art, but no new relevant art was found, therefore the instant claims 1-7 are now allowable over the prior art of record, as the prior art of record fails to teach or suggest the instantly claimed cyan coupler.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 09/963,584
